BeyondTrust Discovery Agent 23.2.0.1370 Release Notes

November 28, 2023

Requirements:

- There is a product dependency on having the .NET 6 Hosting package installed.

New Features and Enhancements:

- Added support for SonicOS devices.
- Added support for F5/BigIP devices.
- Added support for Fortigate Virtual Document Object Models (VDOMs).
- Added an additional method for obtaining Fortigate admin users.
- Added logic to retrieve the BTExecService log files from the remote targets before shutting down the connection.
- Added a runtime option to use the BeyondInsight provided name for the asset name.
- Added a runtime option to return the NetBIOS domain name in the asset record.

Issues Resolved:

- Resolved an issue with domain group recursion levels which increased the scan times.
- Added more timeouts to scan logic to reduce the possibility of a hanging scan.
- Added more abort checks to help speed up the abort detection and processing.
- Added logic to flush the SSH buffers when a command fails.

Known Issues:

- The installation dialogs have string substitutions errors.

Notes:

- Direct upgrades to this version are supported from versions 20.1.0 and later releases.
- This release is available by download from the BeyondTrust Client Portal at https://www.beyondtrust.com/support/.
- The MD5 signature is: 14bb01b82ee5a3e7aeff342f7b71e066
- The SHA-1 signature is: de36e637b9d44b796f7eb566052326cfa625af85
- The SHA256 signature is: bfede01ab759fb52dbcb2a956bd6b83bfd350ffe476ec3e9d259719c20f8b376
