Password Safe-ECM Plugin 18.4.1 Release Notes

January 22, 2019

New Features and Enhancements:
- This initial release of the plugin for integration between the Endpoint Credential Manager and BeyondTrust Password Safe supports the following use cases and credential types:
    - Retrieval of local accounts for Windows endpoints
    - Retrieval of linked accounts for Windows endpoints
    - Retrieval of local accounts for Linux/Unix endpoints
    - Retrieval of linked accounts for Linux/Unix endpoints
    - Retrieval of local Cloud accounts for Web endpoints
    - Retrieval of local Database accounts for use with Remote RDP endpoints using the Bomgar Remote Desktop Agent SecureApp
    - Retrieval of linked Database accounts for use with Remote RDP endpoints using the Bomgar Remote Desktop Agent SecureApp
- In addition to providing access to the accounts above, the plugin handles automatic creation and approval of Release Requests on behalf of the user, resulting in seamless check-out and injection. At the end of a session, the Release Request is automatically cancelled to prevent further access and to allow any configured password rotation to occur.

Notes:
- The Password Safe-ECM Plugin is compatible with:
    - Privileged Access 18.3.3
    - Endpoint Credential Manager 1.2.3 or higher.
