

# Password Safe ECM Plugin 23.1.2 Release Notes

November 9, 2023

## Requirements:

- BeyondTrust ECM v1.6.0+

## New Features and Enhancements:

- Added support for the retrieval of credentials for Web endpoints for External Jump Items list.
- Added support for the retrieval of directory accounts that are linked to cloud managed systems in Password Safe for Web Jump Items.

## Issues Resolved:

- Resolved an issue in which the plugin was attempting to process the same **CredentialsUsed** request multiple times at session end, which caused an unexpected value to return and stopped the ECM service.
- Resolved an issue in which the plugin was making duplicate authentication attempts to Password Safe for the same request and caused an authentication failure for credential injection.

## Notes:

- Certified for GA
- Supports upgrades from any prior release
