

# BT PM App & BT ePO Extension 23.10 Release Notes

November 30, 2023

This release notes document covers updates to Privilege Management ePO Extension and introduces the new BeyondTrust Privilege Management App (BT PM App).

*For more information about the app, please see:*

- [BeyondTrust Privilege Management App Frequently Asked Questions](#)
- [BeyondTrust Privilege Management App User Guide](#)

## Requirements:

- BT PM App can only be installed on Windows machines.

## New Features and Enhancements:

### BT ePO Extension

- Customers can import and export their policy XML file using an upload feature on the ePO **Policy Summary** page. Use this method as an alternative to using the BeyondTrust Privilege Management App.
- The BeyondTrust ePO extension has been updated to be compliant with the Content-Security Policy (CSP) security layer. Users can enable HTTP content security policies in their ePO Orchestrator environment with the latest BT ePO extension.
- Removed reporting and the policy editor from the BT ePO extension. Reporting and policy editor are replaced by the BeyondTrust Privilege Management App.

### BeyondTrust Privilege Management App

- Introduced the ePO BeyondTrust Privilege Management App to enable customers to manage policy and view event data via reporting on their ePO server. The app replaces the policy editor and reporting that were previously integrated in the ePO extension.

## Issues Resolved:

- Resolved an issue with macOS message body configuration not showing correctly on endpoints after changing the custom image.

## Known Issues:

None.

## EPM Components

- BT ePO extension 23.10.2
- BeyondTrust Privilege Management App 23.10.9
  - Web Policy Editor: 23.10.185
