Privilege Management for Mac 21.5 Release Notes

August 19, 2021

New Features and Enhancements:

- Introduced the ability for different durations for approved requests for the User Request management feature.

Issues Resolved:

- Resolved issue in which **defendpointd** printed non-user friendly and uncategorized QString messages when application was installed for the first time.
- Resolved an issue with an incorrect policy schema caused by using incorrect case.
- Resolved issue in which challenge response counter did not match up correctly to attempts remaining when prompt was canceled and re-opened.
- Resolved issue in which the Privilege Management for Mac icon was displayed at the incorrect size on a secondary monitor.
- Resolved a cosmetic issue with dialogs displayed in dark mode.
- Resolved issue in Messages in which the **Publisher**, **Program Name**, and **Program Path** labels were displayed in English when using other languages.
- Resolved issue in which exceeding the maximum number of challenge response attempts for Sudo did not change the challenge response value.
- Resolved issue in which upgrading macOS on M1 devices removes Rosetta, and it cannot be reinstalled.
- The **CrMaxFailsError** was unused in our product. It is now used in Sudo messaging when a user exceeds the challenge response attempt limit, if set.

Compatibility:

- Privilege Management Policy Editor 21.5
- Privilege Management ePO Extension 21.1
- Privilege Management Cloud Adapter 21.5
- BeyondInsight Adapter 21.5

📌 *Note: If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.*

Supported Operating Systems:

- macOS 11 Big Sur
- macOS 10.15 Catalina
- macOS 10.14 Mojave
