Rapid Deployment Tool 1.0 Release Notes

June 30, 2020

Release Statement:

The Rapid Deployment Tool (RDT) is a new free utility available to all Privilege Management for Mac customers using the Privilege Management Console and BeyondInsight management platforms. The RDT removes the requirement for manual script creation during the implementation of a rollout to a Mac estate. Using the RDT a .pkg file can easily be created using the GUI for distribution to all macOS endpoints.

Features:

- Installable package creation for Privilege Management for Mac.
- Installable package that deploys configuration settings for Privilege Management Console management platform.
- Installable package that deploys configuration settings for BeyondInsight management platform.

Compatibility:

- Minimum macOS required is 10.15 Catalina
- BeyondInsight Adapter 5.6
- Privilege Management Console SR2 2.4

Notes:

- Checksum: d06bb99c7627b61d941224ed345a918e2f0fa74a RapidDeploymentTool.dmg.
