

Privilege Management for Windows 23.7 Release Notes

August 29, 2023

Requirements:

- Microsoft .NET Framework 4.6.2 (required to use Power Rules, PowerShell audit scripts, PowerShell API, and Agent Protection)
- Microsoft .NET Framework 4.8 (required to use Multifactor Authentication with an OIDC provider)
- PowerShell 3.0 (required to use Power Rules, PowerShell audit scripts, and PowerShell API)
- Trellix (formerly McAfee) Agent (required if you are installing the Privilege Management client with switch **EPOMODE=1**)

Note: The executable version of the client package includes all necessary prerequisites (excluding .NET Framework) and automatically installs them as necessary. If you use the MSI or ZIP package, you must manually install any necessary prerequisites.

New Features and Enhancements:

Nothing new to note.

Issues Resolved:

- Resolved an issue where WinRM sessions could not be started with the **Enter-PSSession** command on Windows 11.
- Resolved an issue where smart cards managed by ActivClient would not be in our messages when connecting via RDP.
- Resolved an issue that could cause a failure of the System Settings app when attempting to add or alter voice/speech/language packs. Note that System Settings is a UWP-style app so will not show our elevation messages and instead show UAC.
- Resolved an issue where the **ChassisType** information about an endpoint was not being correctly recorded in Events.

Known Issues:

None.

Compatibility:

- Privilege Management Policy Editor **23.7 (recommended)**, 21.6+
- Privilege Management ePO Extension **22.7 (recommended)**, 21.1+
