

# Privileged Identity 7.3.1 Release Notes

February 2, 2023

## New Features and Enhancements:

- Enhanced the personal password store to provide the option to auto-generate passwords.
- Added a feature that allows only auto-generated passwords for the personal password store.

## Issues Resolved:

- Editing a Personal Password now does not require a system name to be present.
- The width of the **Elevate to Systems** drop list now sizes correctly.
- Editing a password change job and setting the reboot option saves correctly upon closing the job details.
- Updated the default **Web.config** file used with the PI web interface to improve the default IIS security configuration.
