

Privileged Identity 7.3.3 Release Notes

November 28, 2023

New Features and Enhancements:

- Added additional logic to allow targeting machine hosts for accounts managed by MySQL.

Issues Resolved:

- Resolved an issue where the permissions are not respected when the call to get the web activity logs occurs.
- Resolved an issue where SSH ports could not be modified or added via the Systems Details. Previously, you could only add customized ports with the CCT feature or with answer files.
- Resolved an issue in the SCL feature where the recovery of passwords did not work if accounts had similar names.

Notes:

- Privileged Identity is a maintenance release from the Security Management/7.3.3 developers branch at commit `c6ec89cc6a1cf6ef536cfe40531ceffa4f03c7ba`.
- Privileged Identity 7.3.3 exe installer Checksum (SHA256):
`65eb2d3cf1553334ea8d71224ffbcfe1c97646155a9a2fb299f316937a323d7c`.
- Privileged Identity 7.3.3 is certified for GA.
- Privileged Identity 7.3.3 supports upgrades from 5.5.4.4, 5.5.5.x, 6.0.x, 7.0.x., 7.1.x, 7.2.x and 7.3.x.
- Privileged Identity 7.3.3 supports BeyondTrust PI ECM Plugin 19.4.2.
