

Endpoint Credential Manager 1.1.0 Release Notes

November 8, 2016

New Features and Enhancements:

- Updated the user interface style of the ECM configurator to be more in line with Vault user interface styles.
- A supported protocol and assembly version is now displayed on the configurator screen.
- The credential_id parameter is now supported within the getCredentialList message.

Issues Resolved:

- Resolved an issue with the ECM sometimes connecting to the main site on an appliance instead of the one configured.
- Resolved an issue with the ECM being unable to connect with TLS 1.2 if older cyphers were disabled.
- Resolved an issue with the ECM sometimes disconnecting due to login taking longer than a few seconds.

Notes:

- This version is compatible with RS 16.1.4+ and PAM 16.1.3+.
