

Integration Client 1.3.10 Release Notes

April 21, 2015

New Features and Enhancements:

- Handles 4 new session events for 15.1.
 - CredentialInjectionAttempt
 - CredentialInjectionAttemptFailed
 - JumpItemAuthorizationRequestUtilized
 - SessionForegroundWindowChanged
- New table and support for custom session attributes.
- Deletes temporary files after 2 days instead of waiting for the temporary directory to be cleared out by the OS.

Issues Resolved:

- Properly checking for error xml when downloading recordings.
- Removed Access Key operation from Integration Client gui.

Notes:

- Integration Client 1.3.10 is compatible with Bomgar Remote Support releases 11.1.3 and greater.
- Integration Client 1.3.10 is compatible with Bomgar Privileged Access Management and Cloud deployments on Bomgar releases 15.1.1 and greater.
