

Integration Client 1.6.3 Release Notes

December 7, 2016

Issues Resolved:

- Resolved an issue with the integration client requesting new OAuth2 tokens every time a schedule was run.
- The start date and duration text boxes are now disabled when a session ID is selected.
- Updated the integration client icon.
- Resolved an issue with using API credentials when no API accounts had been configured for the site.
- Resolved an issue with the integration client not writing to the log when run as a normal user.

Notes:

- Integration Client 1.6.3 is compatible with:
 - Bomgar Remote Support versions 15.1.1 and greater on physical and virtual appliances.
 - Bomgar Remote Support Cloud versions 15.1.1 and greater.
 - Bomgar Privileged Access Management versions 15.1.1 and greater.
- Metrics-DB Plugin 1.6.2 (987) is certified to work with Integration Client 1.6.3.
- Requires Microsoft .NET Framework 4.5 or later.
