

Integration Client 1.7.3 Release Notes

July 14, 2020

Issues Resolved:

- Resolved an issue in which larger sessions, i.e., lots of events, would not process in the SQL plugin because the events collection was released by the server before processing had finished.

Notes:

- Integration Client 1.7.3 is compatible with 18.1 and greater versions of the Secure Remote Access products.
- Metrics-DB Plugin 1.7.3 (200) is certified to work with Integration Client 1.7.3.
