

## iOS Rep Console 2.2.8 Release Notes

July 26, 2016

### New Features and Enhancements:

- With **Command Shell Access from Mobile**, the iOS representative console now has the capability to access the command shell for Windows and Shell Jump sessions.
- **Credential Injection from Mobile** allows iOS representative consoles to support automatic credential handling for Windows login and the Special Actions "Run As" option.

### Issues Resolved:

- Resolved an issue with a grey screen appearing when a session was started from an iPhone 6+ running iOS 8.4.
- Resolved an issue with the Duration selection of Jump Authorization Requests not displaying all of the information correctly.

### Requirements:

This version of the Bomgar iOS Rep Console is certified with:

- iPhones and iPads running iOS 8.2 or greater.
- Existing Bomgar installations, version 14.3.1 or greater.
- Remote Support sites with a trusted CA-signed certificate on the appliance.

### Notes:

- Credential injection requires integration with a password vault.
- The Bomgar iOS Rep Console is available for download in the [App Store](#).
