iOS SDK 2.2.22 Release Notes

May 13, 2021

New Features and Enhancements:

- Update for Xcode 12.5.
- Updated camera selection code and added 3 new public functions to the CameraViewController to allow more external hooks. The new methods include:

Function	Description
@objc public func currentCameraDevice() -> AVCaptureDevice?	Returns the current configured device object
@objc public func flip()	Switches between the back and front cameras
@IBAction public func toggleTorch()	Turns the flashlight on or off if the current camera supports it

Issues Resolved:

- Resolved issue that caused a crash when using the VP9 video coding format.
