

# BT Updater 2.9.1 Release Notes

February 13, 2020

## New Features and Enhancements:

- Added operating system dependencies to restrict download of incompatible package versions onto client machines.
- Added additional trace logging for package download queries.
- Improved package metadata query performance.

## Issues Resolved:

- Resolved an issue with the installer causing the BT Updater service to fail to start on certain versions of Windows 2008 R2 and Windows 2012 R2.
- Resolved an issue where BT Updater attempted to download and install the latest downloaded version of certain subscriptions.

## Notes:

- Requires .NET 4.5.2
- Available through BT Updater
