

# BT Updater 3.1.2 Release Notes

July 11, 2023

## Requirements

- Requires .NET 4.7.2 or later.

## New Features and Enhancements:

- The grid on the main page is now wider.
- Added progress indicator for loading release panel.
- Changed default release notes version display.
- Chevron now collapses the **Client Subscription** details card.

## Issues Resolved:

- Lock now always locks the correct version on the **Subscription** page.
- There is no longer an error in the browser dev tools when selecting release notes.
- Resolved issue in which a Javascript error displayed when selecting subscription.
- Clicking on subscriptions lock now locks the version you are selecting rather than the latest version.
- BeyondInsight Release Notes now load when release notes menu item is clicked.
- Removed the multi-select ability on the **Subscriptions** page because there were no multi-select options.
- **Retry** button for a failed install was re-added to the web UI.

## Known Issues:

- The clear cache pop-up confirmation continues to be displayed after the login session ends.
- For settings through API, a password can be changed to contain one character.
- For settings through API, an email address can be changed against the format rules.

## Notes:

- This update is available via BT Updater.
