

# Identity Security Insights 24.02 Release Notes

February 6, 2024

## New Features and Enhancements:

- Advanced filtering has been added to the Account Summary page, allowing results to be displayed and saved according to complex filter expressions.
- Multiple detections can now be selected and updated at once from the detections dashboard.
- Webhooks can now be configured through the Integrations menu. Detections and recommendations can now be sent via webhook to external third-party solutions.

## Known Issues:

None.

## Notes:

None.
