

Privilege Management for Unix & Linux 10.3.2 Release Notes

November 3, 2020

New Features and Enhancements:

- Security enhancements.
- Added support for RHEL 8 on Linux PowerPC Little Endian.

Issues Resolved:

- Resolved issue in which **pbbench** failed to connect to local server and sync server when **sslfirst** was used.
- PMUL diagnostic message 8531 now makes it clear that failed coms are to the runhost (**pblocald**).
- Resolved issue in which **pbinstall** did not allow entering all valid keywords for **ssloptions** menu item (item 155).
- Resolved issue in which PMUL client only submithost failed SSL communications to logserver.
- Resolved issue in which SSL was not in use when **ssloptions** had *Invalid* option.
- Resolved role-based policy issue in which command was rejected if the runuser contained an underscore (`_`) in the name.
- Resolved role-based policy issue in which **requestuser** did not match to system groups or AD groups as Allowed Run Users.
