Privilege Management SaaS 20.5 Release Notes

November 19, 2020

New Features and Enhancements:

- The Windows Adapter can now be run under FIPS-Compliance mode.
- Removed underscore restrictions on computer hostnames.

Issues Resolved:

- Resolved issue in which changing the hostname of a computer was not reflected in PMC on the next adapter check-in.
- Resolved issue in which the Privilege Management Client version was not accurately reported in PMC.
- Resolved spread issue that caused unnecessary delays in policy deployment.

Compatibility:

- PM MMC snap-in: 5.7.301.0
- PM for Windows: 5.7.301.0
- PM for macOS: 5.7.91
- PM Reporting: 5.6.82
