

Privilege Management ePO Extension 21.1 Release Notes

April 13, 2021

New Features and Enhancements:

- Added support for Mac smart cards.
- Added publisher and product name matchers for uninstaller.
- Removed obsolete General Rule for **Unlock a Shared Workstation**.
- The color picker has been updated on message design pages.

Issues Resolved:

- Resolved issue with VirusTotal broken link for adding initial reputation.
- Application matchers with blank descriptions now show *<No Description>* to enable navigation.

Compatibility:

- Privilege Management Windows Client 5.2+, **21.2 (recommended)**
- Privilege Management Mac Client 5.2+, **21.2 (recommended)**
- Privilege Management Reporting 5.4+, **21.1 (recommended)**
- The following browsers are compatible with the ePO extension:
 - Safari v10 and higher
 - Internet Explorer version 11.6 and higher
 - Chrome (latest version)
 - Firefox (latest version)

Note: Please also see the McAfee ePO compatibility list: kc.mcafee.com/corporate/index?page=content&id=KB51569.

- McAfee Agent 5.6+, **5.7 (recommended)**
- McAfee ePO Server 5.10 (recommended), 5.9
- McAfee Endpoint Security (ENS)
