Privilege Management for Mac 22.1 Release Notes

February 22, 2022

New Features and Enhancements:

- Standard users can now launch the Console application using Privilege Management through the Finder context menu to view logs.
- Added additional fields to audit events to more reliably connect an audit to the matching policy rule.
- Updated the mac PMC Adapter to complete authentication via Oauth methods rather than the traditional mTLS.
- Made improvements to how Privilege Management for Mac is installed so that MDM solutions like Munki install Privilege Management for Mac without errors.

Issues Resolved:

- Resolved issue in which using Multifactor authentication messages it was possible to have multiple messages dialogs appear when only one was intended.
- PMC portal now shows OS description as *Monterey* when a Monterey endpoint is connected.
- Resolved issue in which Privilege Management for Mac could remove JamfConnect mechanisms from the authorization database, causing the JamfConnect login screen not to appear.
- Resolved issue for matching on publisher in the policy for packages such as beta OS builds.

Compatibility:

- Privilege Management Policy Editor 22.1
- Privilege Management ePO Extension 21.2
- Privilege Management Cloud Adapter 22.1
- Privilege Management Console Adapter 22.1
- BeyondInsight Adapter 22.1

> 📌 **Note:** *If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.*

Supported Operating Systems:

- macOS 12 Monterey
- macOS 11 Big Sur
- macOS 10.15 Catalina
