Privilege Management for Mac 23.5.1 Release Notes

July 20, 2023

Requirements:

- Trellix (formerly McAfee) Agent (required if you are installing the Privilege Management client with Trellix)

New Features and Enhancements:

This is a maintenance release. There are no new features to note.

Issues Resolved:

- Resolved an issue where the _avectodaemon user password rotation was visible to third-party security applications.
- Resolved an issue where authorizations would fail when supplied a specific username and password.
- Resolved an issue where passwords sent from Password Safe with special characters were not being applied correctly to macOS endpoints.
- Resolved an issue where Privilege Management for Mac would prevent users from viewing passwords saved within Chromium browsers (for example, Google Chrome).
- Resolved an issue where users were presented with both native macOS and Privilege Management for Mac dialogs when installing applications that requested a specific right.
- Resolved an issue with the Voiceover app failing to allow user functionality with Apple scripts.

Known Issues:

None.

Compatibility:

- Privilege Management Policy Editor 23.5
- Privilege Management ePO Extension 22.7
- Privilege Management Console Adapter 23.5
- BeyondInsight/Password Safe 23.1
- Trellix Agent 5.7

> 📌 **Note:** *If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.*

Supported Operating Systems:

- macOS 13 Ventura
- macOS 12 Monterey
