Privilege Management Reporting 5.6 Release Notes

April 21, 2020

New Features and Enhancements:

- Added a parent process file name to Event Details Report for macOS.
- Added a command line advanced filter for mac Discovery report.
- Improved the description used in the display of macOS Bundle events.
- Improved performance of the **CopyFromStaging** process.
- Added logging for **CopyFromStaging** batch size to allow monitoring of Privilege Management Reporting utilization.
- Added a **Summary** dashboard actions bar chart for Windows and for Mac.
- Added a **Summary** dashboard table.
- Updated the navigation menu.
- Integrated BeyondInsight with Reports, Event Collector, and Privilege Management Reporting database.

Issues Resolved:

- We now prevent CSV command injection on the **Reports** pane in the PMC Portal.
- Resolved an issue with an incorrect **Range End Time** when drilling down from dashboard to detailed view.
- Resolved an issue that caused data to be improperly displayed on the Message Distribution Chart in the User Experience report.
- Corrected the colors on the **Summary** pages for **Applications Discovered** and **User Requests** charts.
- Resolved an issue that caused a **CopyFromStaging_Processes** query plan error.
- Resolved an issue that caused ANSI warnings to fill up the Event Viewer log on Windows Server.
- Resolved a performance issue with **CopyFromStaging_PrivilegedGroupModificationBlocked**.
