

Privileged Identity - ECM Plugin 19.4.2 Release Notes

November 12, 2020

New Features and Enhancements:

- For customers whose security guidelines prohibit concurrent checkouts of a given credential, the integration will now handle retrieval of stored / managed and shared credentials without the need for the users to have the **Ignore Password Checkout** delegation permission.

Notes:

- The Privileged Identity ECM Plugin requires ECM 1.5.0+.
- The Privileged Identity ECM Plugin is compatible with Privileged Identity 5.5.5.2+.
- The Privileged Identity ECM Plugin requires 20.1.1+ of the Secure Remote Access products.
