

Privileged Identity 7.3.0 Release Notes

November 1, 2022

New Features and Enhancements:

- Updated events for Event Sink generation to be more relevant to the application.
- Added Python 3.x support for Disconnected Account Manager.
- Added additional logging to include web service and processors when enabling all logging.
- Added support for Oracle containerized databases to Oracle password change jobs.
- Improved the ServiceNow output to prevent it from creating multiple tickets.
- Added a filter to console global delegation dialog for identity name.
- Added a new file store API that allows for searching/filtering for stored files.
- Event sink now includes password checkout comments.
- Added support to the Web UI's **Jobs** page, including filterable string values for **Operations** and **Results**.
- Added support for Group Managed Service Accounts to allow installation and usage, not requiring a password.
- Changed the **Web Activity** filter to be a free-form and textual search for operations.
- Added support for granular permissions for job access.

Issues Resolved:

- Resolved issue in which the **RemoteCommandBuilder.exe** crashed when attempting to use **StdIn** or **StdOut**.
- Resolved issue in which the PowerShell cmdlet **Get-LSListDelegationPermissionsOnSharedCredentialList** did not work when there was a space in the list's name.
- Resolved issue in which the SSH key update job did not update the **authorized_keys** file when the option was selected.
- Resolved issue in which the display limit of disconnected accounts only showed a max of 30 users.
- Resolved issue in which importing a self-elevation permissions list with more than 30 users only displayed 30 users after import.
- Resolved issue in which the license was not honored after configuring DAM in the Web UI.
- Resolved an issue in which a job to update a Task Scheduler account was not propagating.
- Resolved issue in which creating a new password change job through the Web UI the user could not proceed past the **General** tab.
- Resolved issue in which enabling the **Manage Scheduled Jobs** permission for low-powered users did not show any jobs in the Web UI.
- Resolved issue in which a low-powered user who had the **Manage Scheduled Jobs** permission could not alter and save job properties.
- Resolved issue in which a delegation identities list get truncated when exported.
- Resolved issue in which the cached activity for shared credentials list is not correctly updated.
- Resolved issue in which scheduled jobs updated when editing a job comment.
- Resolved issue in which a password change job created through the Web UI silently failed when there were spaces in the mandatory fields.

- Resolved issue in which a file name was URL-encoded when updating the file to the file store in the Web UI.
- Resolved issue in which the LDAP type was not correctly detected when adding passwords through the API.
- Resolved issue in which an account elevation was immediately de-elevated if additional zone processors were in contention.

Notes:

- PI 7.3.0 exe installer SHA 256 checksum: 12042cc553d63d3d6010d9eab973601a8d12fdebb30b8ce59ddf8d5682273439.
- Privileged Identity 7.3.0 supports upgrades from 5.5.4.4, 5.5.5.x, 6.0.x, 7.0.x., 7.1.x and 7.2.x.
