Android Access Console 2.2.11 Release Notes

July 13, 2023

Requirements:

- Android 7.0 or later.
- BeyondTrust Privileged Remote Access 21.1 or later.

> **i** *For more information, please see Supported Platforms at https://www.beyondtrust.com/docs/privileged-remote-access/documents/features/pra-supported-platforms.pdf.*

New Features and Enhancements:

- Includes improvements to generating and sending logfiles. Now a long press on the app version in the bottom right corner gives you the option to save or send logfiles.
- Now allows the Privileged Remote Accesssite URL to be locked using your MDM configuration.
- Now provides a warning notification if the Android device is rooted.

Notes:

- Certified for GA.
