iOS Access Console 2.2.2 Release Notes

July 19, 2016

New Features and Enhancements:
- With **Command Shell Access from Mobile**, the iOS access console now has the capability to access the command shell for Windows and Shell Jump sessions.
- **Credential Injection from Mobile** allows iOS access consoles to support automatic credential handling for Windows login and the Special Actions "Run As" option.
- Use **Touch ID** to log into the access console on iOS devices with the Touch ID capability.
- **iOS 3D Touch Support** has arrived on the Bomgar mobile access console. Mobile users can peek at active sessions and pop to join them, as well as start sessions faster by accessing their top three most commonly used Jump Items. Users can also use Touch ID to access their saved credentials and access Bomgar more quickly.

Issues Resolved:
- Resolved an issue with the Duration selection of Jump Authorization Requests not displaying all of the information correctly.

Requirements:
- Runs on iPhones and iPads running iOS 8.2+.
- Compatible with PAM 15.2.1+.
- A trusted CA-signed certificate must be installed on the appliance.

Notes:
- The Bomgar iOS Access Console is available in the App Store.
