Privileged Remote Access 22.3.2 Release Notes

December 8, 2022

Requirements:

- This version of Privileged Remote Access has been certified for physical BeyondTrust Appliances, virtual BeyondTrust Appliances, and cloud deployment models.
- 22.3.2 PA requires Base 6.2.0.

New Features and Enhancements:

- Added macOS Ventura support.

Issues Resolved:

- Resolved issue that caused Jump Clients to unexpectedly uninstall.
- Resolved incorrect access to screen sharing tools when at the Windows login screen.
- Added credential injection workaround for web sites that pollute the global JS namespace.
- Resolved issue that caused blocked Jump Client upgrades when Legacy SSL was enabled.
- Resolved hang in Shell Jump when diacritical characters were displayed.
- Resolved extraneous *Path does not exist* error on initiation of some web access console sessions.
- Resolved pagination issue with API calls returning large numbers of results.
- Resolved Jump approval authorization error path that could cause system outage.
- Resolved discovery-related Jumpoint crash.
- Resolved missing field when Group Policy copied via API.
- Updated Configuration API version to 1.5.
- Improved handling of malformed SAML responses.
- Resolved issue that caused unresponsive behavior during import of very large number of Vault accounts.
- Improved clipboard error handling during RDP file transfer.

Notes:

- Supports upgrades from Privileged Remote Access 22.1.4 PA+.
- Requires Integration Client 1.7.3.
- Requires Endpoint Credential Manager (ECM) 1.6.0.
- 22.3.2 PA includes VSC 1.2.5.3.
- This release is certified with the following mobile versions:
  - iOS Access Console 2.2.5+
  - Android Access Console 2.2.10+
