

Privileged Remote Access 23.1.1 Release Notes

January 24, 2023

Requirements:

- This version of Privileged Remote Access has been certified for physical BeyondTrust Appliances, virtual BeyondTrust Appliances, and cloud deployment models.
- 23.1.1 PA requires Base 6.2.0.

New Feature:

- Infrastructure Access Console (IAC): Advanced users, such as developers, can select Infrastructure Access Mode when logging in to the console. This provides a simpler console, available from the system tray or menu bar, and convenient for protocol and database tunneling, and BYOT sessions.

Issues Resolved:

- Resolved issue with hang at Windows login screen.
- Resolved service interruption caused by deleted Jump approval approver.
- Resolved some strings displaying in Dutch even though German language is selected.
- Disabled dynamic update of Jump Client upgrade status in web rep console due to performance issues.

Notes:

- Verified for GA.
- Supports upgrades from 22.1.4 PA+.
- Supports ECM Protocol 1.6.
- Requires ECM 1.6.0.
- Requires Integration Client 1.7.5.
- Includes VSC 1.2.6.1.
- This release is certified with the following mobile versions:
 - [iOS Access Console 2.2.5+](#)
 - [Android Access Console 2.2.10+](#)
