New Features and Enhancements:

This is a maintenance release. There are no new features to note.

Issues Resolved:

- Resolved incorrect enforcement of group lookup name for SAML providers.
- Resolved web access console service interruption.
- Resolved login failure when SCIM and SAML were both used for authentication.
- Resolved standalone Hangul/English toggle key not functioning.
- Resolved Remote RDP session refresh issues.
- Resolved unexpected changes to approval lists on upgrade.
- Resolved obscure Web Jump injection failure.
- Resolved spurious error message during SAML portal login.
- Incorporated recent changes to Eastern European Summer Time.
- Added RDP support for 8-bit screen depths.
- Resolved a rare issue that prevented access to **Jump** menu in /login.
- Resolved crash in customer client when copying *Full Terms & Conditions* text.
- Resolved Rep Console scaling issue that could result in overly large text .

- Improved Shell Jump behavior that occurred when connecting to some SFTP servers.
- Resolved incorrect setting for DUO provider co-existence.
- Aligned behavior of credential dialog when only domain is given to match Windows native dialog.
- Resolved upgrade failure with Rep Consoles set to use SAML login.
- Resolved issue with live updates that required software restart when increasing maximum Jump Clients on non-clustered sites.

Known Issues:

None.
