

Android Rep Console 2.2.0 Release Notes

November 26, 2012

New Features and Enhancements:

- Android Rep Console now supports Equilibrium
- Intelligent Collaboration is now supported in the Android Rep Console
- Android Rep Console now has the ability to kick any member from a session

Issues Resolved:

- Resolved an issue with predictive text sending multiple characters to the remote system through screen sharing
- Resolved an issue with the "All Jump Client" list loading slowly when logging in on high latency connections
- Resolved an issue with switching screen sharing quality from "Best Performance" to "Performance and Quality"

Requirements:

The Bomgar Android Rep Console works with:

- Android Smartphones and Tablets running Android 2.2+
- Existing Bomgar installations, version 12.1.1 or greater
- Support sites with a trusted CA-signed certificate on the appliance
