

## Base 3.1.8 Release Notes

**February 19, 2010**

This latest release of Bomgar's Base software, version 3.1.8, is certified for the Physical Appliances only (B100, B200, B300 & B400).

**New Features and Enhancements:**

- Added automatic tabbing whenever a "." is entered during Static Route configuration
- Resolved an issue where interrupting a package downloads could cause installation problems
- Increased the Copyright year to 2010

**Issues Resolved:**

- "Security Patch" has been renamed to "Service Patch"

**Notes:**

- This version of Base includes Service Patch 8.
