Base 5.5.0 Release Notes

August 13, 2019

Requirements:

- This version of the BeyondTrust Base software has been certified for physical BeyondTrust Appliances (B200, B300 & B400), virtual BeyondTrust Appliances (Azure, VMWare & Hyper-V), and cloud deployment models.
- Requires Base software 5.2.0+ for upgrades.

New Features and Enhancements:

- Base 5.5.0 has the new BeyondTrust branding.

Issues Resolved:

- Support for Azure Accelerated networking.
- Security fix for TCP SACK issue.
- Allow TLS configuration with only GCM-based ciphers.
