

BeyondTrust ECM Plugin for Delinea Secret Server 19.4.3 Release Notes

December 14, 2023

New Features and Enhancements:

- Increased max message and buffer size on API client to allow larger responses.
- Added logging to allow tracking of execution time for individual API calls.
- Added a setting to allow the integration to search for domain credentials in configured domains even when host domain is known.

Issues Resolved:

- Addressed an issue which prevented authentication for users whose Secret Server accounts originated from Azure AD.

Notes:

- Delinea was previously known as Thycotic.
- Certified for GA.
- The ECM Plugin requires ECM 1.6.0+.
- The ECM Plugin supports upgrades from any prior release.
