BeyondTrust Endpoint Credential Manager 1.5.0 Release Notes

November 19, 2019

New Features and Enhancements:

- ECM protocol incremented to 1.5. This release maintains backward compatibility with SRA appliances still running the 1.4 protocol.
- Added support for customized plugins which simply wrap one of the standard plugins.
- Added support for accepting Rep info on the GetEncryptedCredential call.
- Added support for returning user-friendly error messages to the appliance (for display to the end user).
