Integration Client 23.1.1 Release Notes

November 7, 2023

New Features and Enhancements:

- Added support for using a Microsoft Access Database to store local settings within 64-bit version; previously this configuration was only possible using the 32-bit version of the application.

Notes:

- Integration Client 23.1.1 supports upgrades from any prior release.
- Integration Client 23.1.1 is compatible with 19.1 and later versions of the Secure Remote Access products.
- Metrics-DB Plugin 23.1.1 is certified to work with Integration Client 23.1.1.
- Certified for GA.
