

iOS Representative Console 3.1.3 Release Notes

May 9, 2023

New Features and Enhancements:

- Now displays a warning if the device is jailbroken.

Issues Resolved:

- Resolved an issue with new session sounds playing even though the device was in silent mode.
- Resolved an issue with starting two sessions and the second session not showing the default screen.
- Resolved an issue with being able to send blank chat messages in team chat.
- Now displays a *No results found* message when searching for a team that does not exist.
- Resolved an issue with the privacy screen button not changing state.
- Resolved an issue with the cursor sometimes being unresponsive.
- Resolved an issue with a server rejection error message sometimes being displayed when pinning a Jump Client.

Notes:

- Runs on both iPhone and iPad running iOS 15+.
- Compatible with Remote Support 21.1+.
- The iOS Representative Console is available in the [App Store](#).
