

Remote Support 10.2.3 Release Notes

February 2, 2009

A handful of minor issues have been resolved in this latest maintenance release.

Issues Resolved:

- Customer Client
 - Resolved an issue where the Custom Uninstall Message text was not being honored (i.e. only the default message was being displayed)
- Representative Console
 - Resolved an issue where, in rare cases, Jump clients were not enumerating correctly in the display list
 - Resolved an issue with high CPU usage on the Representative's machine when a large list of Jump clients was expanded
