

BeyondTrust Appliance U-Series Software 3.3.1 Release Notes

November 2, 2021

New Features and Enhancements:

- Discovery Scanner configuration is now included in the Configuration Wizard.
- Updated the main installer for 3.3.1 to check for a minimum 3.1.18 version of .NET Core.
- Reimplemented changing Central Policy password on the **Maintenance** page.
- Removed legacy API calls:
 - **GET /UVMInterface/api/UVMConfiguration/CheckPrerequisites HTTP/1.1**
 - **POST /UVMInterface/api/UVMConfiguration/ValidateUserPasswords HTTP/1.1**

Issues Resolved:

- Corrected typo on main configuration screen.
- Resolved issue in which backups failed when the **storedaccountinfo.db** had no record of the local admin (Windows Server 2012).
- Resolved issue in which BTUpdater Client ID was not regenerated during configuration.
- Resolved issue in which the **Plugins** folder was missing in **Backup** after upgrade from 3.3.0.
- Resolved issue in which **https://servername:443/ReportServer** was not set in SSRS.
- Resolved issue in which configuration let you select **FINISH** after a failed step, but then you were redirected to the **Appliance not configured** page.
- Resolved issue in which the Appliance Account Management service installer failed for U-Series SQL Free Appliances.
- Resolved issue in which the backup process crashed while processing session files.
- Resolved issue in which the BeyondTrust Appliance High Availability Master service did not start automatically if the print spooler service was not running (Windows Server 2012).
- Resolved issue in which *Appliance Health - HA Master Service* could appear twice in the service list.
- Resolved error that occurred in configuration wizard when Discovery Tool installed instead of Retina.
- Resolved issue in which the configuration process disabled Retina processing in the **remManagerSvc** config file, resulting in failed scans.

Notes:

- This update is available via the BeyondTrust Updater or as a manual installer from the download tool.
- .NET Core 3.1.18 or later is required (available through BeyondTrust Updater).
- The new Deployment and Configuration Wizard is dependent on BeyondInsight 21.2.
