

# BeyondTrust Appliance U-Series Software 3.4 Release Notes

January 13, 2022

## New Features and Enhancements:

- Upgraded AngularJS to 1.8.5.
- Windows and SQL Keys can now be entered by the customer. The 3.4 release on an unlicensed image displays a prompt for the required license keys.
- Added a counter to the **Diagnostics** page to show the amount of RAM being used.
- Added Team Passwords to the list of services managed by High Availability.
- Migrated Image Post-Deploy Script steps into the Configuration Wizard.
- Retired management of Enterprise Update Server credentials in **Maintenance**.
- Added two new **Hardening Override Settings: IPv6** and **Hardened UNC Paths**.

## Notes:

- This update is available via the BT Updater or as a manual installer from the download tool.
- .NET Core 3.1.18 or later and .NET Core 5.0.6 or later are required (available through BT Updater).
- The Deployment and Configuration Wizard is dependent on BeyondInsight 21.2.
