Security Package Update Installer 3.1.0 Release Notes

September 30, 2021

New Features and Enhancements:

- Improved error message handling that is displayed in web console.
- Enhanced package handling logic in relation to multiple packages with same major version.
- Updated properties of **SUPI.exe** file to match current release version.
- Added handler for Windows pending file rename operations during installation.

Known Issues:

- SUPI Service API allows creating duplicate schedules which breaks processing (not UI).

Notes:

- This update is available via the BeyondTrust Updater or as a manual installer from the download tool.
- The desktop **SUPI.EXE** no longer has a user interface but can still be used at the command prompt to support scripting.
- SUPI 3.x.x is a prerequisite to installing UVM Software 3.2.2 and later.
